

Kerish Products presents a new version of Kerish Doctor 2017, a comprehensive computer maintenance solution

December 30, 2016

Kerish Products' development team announces the release of version 4.65 of Kerish Doctor, a comprehensive computer maintenance solution.

The product is being positioned as a “Repair + Cleanup + Optimization + Protection” solution that prevents system crashes, fixes system errors, cleans the system of digital “junk”, optimizes and protects the user’s computer.

The new version features a Windows startup optimization capability based on cloud data, search for large data volumes, search for file duplicates, as well as a number of other useful tools.

The new version of the software offers optimized search for digital “junk”, improved UI navigation with visual tips, as well as a number of other enhancements.

You can find additional information and download the latest version of the product at www.kerish.org
