

# **Kerish Products presents Kerish PC Doctor, the new version of integrated solution for computer care**

*November 16, 2023*

**Kerish Products** development team announces updating **Kerish PC Doctor**, an integrated solution for computer care, up to the **4.95** version.

The product is positioned as a complete solution for the automatic maintenance of Windows-based computers. The program will prevent crashes, fix system errors, clear away digital trash, and optimize and protect your computer.

The new version introduces a new hardware monitor that supports the vast majority of known devices. For the new hardware monitor, we enabled a feature to display the widget on the desktop or on top of all windows. The widget can show the activity and temperature of PC devices in real time.

The new hardware monitor can now monitor the physical state of the laptop battery, and it warns the user in advance if it becomes degraded. In addition, the new hardware monitor can now monitor power supply voltages, and it warns about voltage failures on the motherboard.

Added the ability to select a portable version for USB-Flash during installation.

Improved the trash cleaning algorithms.

Added the feature to auto shut down the PC using a timer.

Updated the file shredder – Now it is possible to configure methods for erasing information.

Updated the "Internet Booster" tool – New settings were added, and its interface is improved.

Added new recommendations to the Recommendations Center. They can be applied with one click.

Support for touch screens has been improved – The interface is now easy to operate without a mouse. All lists can now be scrolled, and everything can be double-clicked.

Many interface improvements have been made, improved the network code and improved the real-time failure prevention system.
