

Kerish Products presents Kerish Doctor 2022, the new version of integrated solution for computer care

March 14, 2022

Kerish Products international development team announces updating **Kerish Doctor**, an integrated solution for computer care, up to the **4.90** version.

The product is positioned as a complete solution for the automatic maintenance of Windows-based computers. The program will prevent crashes, fix system errors, clear away digital trash, and optimize and protect your computer.

The design of the application has been completely redrawn, including the logo. Added interactive tips that help you better navigate the new features of the program.

The new version includes the long-awaited **Disk Defrag** tool. Now not only digital garbage will be cleaned, but also smart background defragmentation of disks when the computer is idle. This will speed up access to data on them.

Fully integrated with **S.M.A.R.T.** drive self-diagnosis technology. This will allow you to assess the condition and wear of disks more accurately in real time. Now **Kerish Doctor** will warn you in advance when your SSD or hard drive is worn out.

You can find more information and download the latest version of this product on <https://www.kerish.org>.
