

## **Kerish Products presents Kerish Doctor 2018, the new version of integrated solution for computer care**

*May 31, 2018*

The Russian team of the Kerish Products developers announces updating Kerish Doctor, an integrated solution for computer care, up to the 4.70 version.

The product is positioned as a complex for Repair + Cleaning + Optimization + Protection, which prevents failures, fixes system errors, removes digital ‘garbage’, improves performance, and protects your computer.

The new version is completed with a ‘Hardware Monitor’ to control the status of PC devices, routine free memory optimization option, and many other tools. Already existing software tools have been significantly improved. Protection against unwanted and malicious extensions of web browsers has been added. Reputation for installed software has been included: the program recommends uninstalling software marked by multiple users as either imposed or unwanted.

The developers updated the interface, enhanced the operation stability and added many minor improvements.

You can find more information and download the latest version of this product on [www.kerish.org](http://www.kerish.org).
